SCORPIONSHIELD

Cybersecurity Training | Consultancy | Auditing

Why Scorpionshield ?

We are experienced professionals who worked in well-known companies on top technical positions of cybersecurity and IT. Each of our pen testers has real senior level experience in penetration testing.

Our work is mostly performed using manual testing approach, we do not only use automatic scanners but incorporate real attack techniques that could be used against an organization. Our reports are written by hand, not auto generated by tools.

All our experience allows us to have a wider view on cybersecurity, we have knowledge from a technical perspective on how hackers operate and what are the biggest cybersecurity threats for today's world, but also from a management perspective from a CISO point-of-view and speak directly to company board members.

Motivation

Scorpionshield's DNA – The CISO

- Most corporations decide not to hire a Chief Information Security Officer (CISO), or someone alike, to champion their information security program, due to many factors, including cost and lack of awareness of such role.
- Typical companies have staff that manage their networks and servers, including firewalls or other security devices, but remain challenged when it comes to understanding their corporation's strategic security needs, as well as the path towards security certifications needed to be trustworthy.
- Employing an executive-level can be very cost prohibitive and even an overkill, although many do not need a full-time CISO - all they really need is a trusted advisor, who can provide thought leadership on creating an effective information security program and use the current resources in place, to cost effectively manage it.

CSX on the State of Cybersecurity in 2019

Motivation

CYBERSECURITY SKILLS GAP

70%

UNDERSTAFFED

assume they are understaffed on cybersecurity

60%

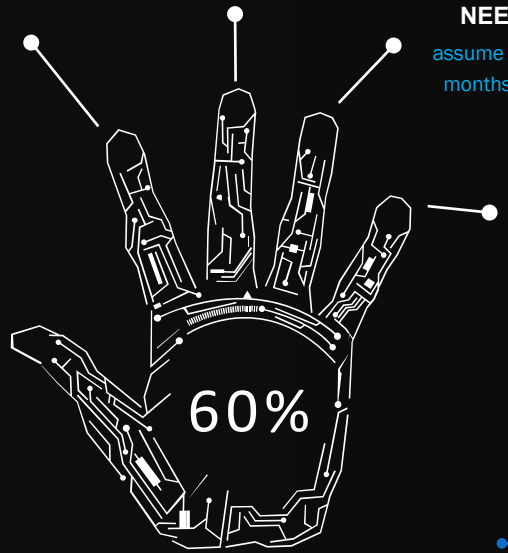
OPEN JOBS

have open positions on cybersecurity

33%

NEED 6 MONTHS

assume they need at least 6 months to fill-in vacancies



75%

UNDERREPORTED

Breaches are not reported at all, and half (50%) say they do not report even when obliged by law to do it

25%

UNDERQUALIFIED

are underqualified for cybersecurity positions they offer

of all information security professionals believe their company will be attacked this year

Services

- Our Vision is living and working in a more Cyber secured World.
- Our Mission is to assure an offering that provides companies with a recognized industry expert to take care of their security needs, to take the worry and confusion out of running a secure environment and dealing with complex regulatory compliance, leaving companies free to run their own business operations.
- Our Purpose is to Train and Provide On-Demand Services for:
  _Certified Chief Information Security Officers
  _Certified Ethical Hackers
  _Data Protection Officers
  _Certified Forensic Investigators

C|CEH Academy

- The C|EH Certified Ethical Hacker will immerse the participants into an interactive environment, where the consultants show how to scan, test, hack and secure their customers' systems, through in-depth knowledge and practical experience, understanding how perimeter defenses work and how intruders think and operate.

- We examine what organizations are doing to stay relevant and competitive in this fast-paced cybersecurity world, and which ones are doing it best. We then strategize using the best local and global resources, in order to understand the implications of every choice our clients can make. Get in touch about how we can help you.

DPO Academy

DPO Academy

- The Data Protection Officer (DPO) is an enterprise security leadership role required by the General Data Protection Regulation (GDPR). Data protection officers are responsible for overseeing a company's data protection strategy and its implementation to ensure compliance with GDPR requirements.
- Looking to develop your business compliant but not sure where to turn? Need help planning or executing your information security audit? Let us guide you.
  Developing a strategy on compliance with the ISO/IEC 27001:2013, or getting help to hatch or maintain a Certification, can be a dauting task.

- We are Lead Implementers and Lead Auditors IN the Standard, with recognized work done on several organizations in different industries. Let us guide you. Any organization can move towards certification on ISO27001 and increase value for himself and for its customers. We work with small incremental changes, general awareness programs in information security, but building for the future in today’s rapidly evolving environment.

C|HFI Academy

C|CHFI Academy

- A Computer Forensics Investigator or Forensic Analyst is a specially trained professional who works with law enforcement agencies, as well as private firms, to retrieve information from computers and other types of data storage devices.
- Equipment can often be damaged either externally or internally corrupted by hacking or viruses. The Analyst should have an excellent working knowledge of all aspects of the computer including but not limited to hard drives, networking, and encryption.
- The C|HFI Certified Computer Hacking Forensics Investigator is the proper expert consultant for detecting hacking attacks and properly extracting evidence to report the crime and conduct audits to prevent future attacks.
- These techniques are being used by police, government and corporate entities.
